RESEARCH INTERESTS

Translational Clinical Science
Neuroimaging

Machine Learning
Medical Device Development

EXPERIENCE

Postdoctoral Research Associate

Jan 2024 - present

Oxford University

I am currently translating into practice the analysis software which I wrote during my DPhil, having won postdoctoral funding from the NIHR to do so. I aim to make this software available and usable for clinicians and researchers in neonatal neuroscience.

DPhil Student

Oct 2019 - Jan 2024

Oxford University

I studied my DPhil (PhD) in the paediatric neuroimaging group of Oxford University, where I developed new, clinically-viable methods of detecting pain in newborns. Currently, no methods of detecting infant pain are approved by medical regulatory agencies, and as such there is a lack of pain relief available for newborns. I developed new data processing and analysis techniques to provide these measures for use in clinical trials and at the cot-side.

Clinical Scientist

May 2017 - Oct 2019

Orthotic Research & Locomotor Assessment Unit

As a clinical scientist, I had a split clinical and technical role. In my technical role I wrote software to process and display electromyographic data for interpretation. In my clinical role I collected and processed complex movement analysis data from patients and research participants, and identified and explained potential artefacts to multidisciplinary team meetings. I set up lunchtime seminars for technical staff and I was often called on to solve technical issues in the two full-time movement analysis labs that the unit runs.

Trainee Clinical Scientist

Aug 2014 - May 2017

National Health Service

On the competitive, funded, 3-year NHS Scientist Training Programme, I undertook supervised clinical work. I also conducted a study into haemodialysis clearance of dialysis outpatients, was involved in the initial evaluation of new medical devices and wrote new commissioning guidelines.

EDUCATION

DPhil (PhD) in Paediatric Neuroimaging Oxford University	(anticipated) 2019 - 2024
MSc in Clinical Science (Clinical Engineering) King's College London <i>Distinction</i>	2014 - 2017
MEng in Biomedical Engineering University of Sheffield <i>First Class with Honours</i>	2010 - 2014

QUALIFICATIONS

Chartered Engineer Institute of Engineering & Technology
Clinical Scientist (clinician) Health & Care Professions Council

AWARDS AND FUNDING

Postdoctoral Internship Award — £18,900	National Institute of Health Research	2023
Postgraduate Research Award — £2,500	Institute of Engineering & Technology	2023
Turing Community Award — £1,500	Turing Institute	2022
Industrial Partnership — £11,500 p.a.	Reckitt Benckiser	2020
EPSRC Studentship — <i>fees & stipend</i>	Oxford University	2019
Young Professional Bursary — <i>conference expenses</i>	Posture & Mobility Group	2016
Steel Circle membership for contribution to student life	University of Sheffield	2015
Sheffield Graduate Award for extracurricular activity	University of Sheffield	2014
Poster Prize for final year project	University of Sheffield	2014
SURE prize — <i>stipend</i>	University of Sheffield	2013

TEACHING

Software Engineering <i>University of Oxford</i>	2020 - present <i>Demonstrator</i>
Mock OSFA Examinations <i>NHS Healthcare Science Network</i>	Mar 2019 <i>Examiner</i>
Data Quality & Artefacts <i>Orthopaedic Institute</i>	May 2018-19 <i>Guest Lecturer</i>
Lunchtime Teaching <i>Robert Jones & Agnes Hunt Orthopaedic Hospital</i>	2017 - 2019 <i>Organiser</i>

COMMITTEES

Equality, Diversity & Inclusion Committee <i>Doctoral Training Centre, Oxford</i>	2021 - 2022 <i>Student Representative</i>
---	--

College Ball Committee <i>Linacre College, Oxford</i>	2020 <i>Chair</i>
---	----------------------

Scientific Programme Committee <i>Medical Physics & Engineering Conference</i>	2018 <i>Session Chair</i>
--	------------------------------

Bioengineering Industrial Advisory Board <i>University of Sheffield</i>	2018 - present <i>Committee Member</i>
---	---

Rehabilitation & Biomechanics Special Interest Group <i>Institute of Physics & Engineering in Medicine</i>	2015 - 2018 <i>Committee Member</i>
--	--

I drafted responses to government consultations, wrote a magazine article, and designed a public information leaflet on specialist seating.

Sheffield Bioengineering Society <i>University of Sheffield</i>	2012 - 2013 <i>President</i>
---	---------------------------------

As president, I led the team to double membership numbers and improve the society finances. I built the society website and was nominated by the team for the President of the Year Award. I also organised the finances for the faculty ball.

OUTREACH

Bedtime Stories for Very Young Engineers <i>Royal Academy of Engineering</i>	2021 <i>Storytelling engineer</i>
--	--------------------------------------

As part of a RAEng project to produce stories to interest 2-4 year-olds in engineering, I wrote and narrated a short children's story about Lara the Llama who wanted (and managed) to fly.

Work Experience Supervision <i>Various</i>	2015 - 2020 <i>Supervisor</i>
--	----------------------------------

I have arranged and supervised 4 work experience visits for students interested in healthcare science, and led a visit from undergraduates at a local university.

Big Bang Fair <i>Young Scientists & Engineers Fair</i>	2019 <i>Outreach volunteer</i>
--	-----------------------------------

Biomedical Engineering Careers Talks <i>University of Sheffield</i>	2016-17 <i>Guest Lecturer</i>
---	----------------------------------

I'm An Engineer, Get Me Out Of Here <i>Royal Academy of Engineering</i>	2015 <i>Outreach volunteer</i>
---	-----------------------------------
